

## Sea Kayaking with the Whales : Campobello Island Sept 21 and 22

Sea Kayak where whales migrate passing between two nations, Canada and the United States. We'll spend two days exploring the dynamic coastline of Campobello Island, stepping back in time among the surrounding islands where the art of weir fishing is still practiced and where 20 foot tides expose a unique intertidal zone and produce amazing currents. Whales follow the flow of food through the "feeding grounds" as the locals call it, just off the beautiful Campobello Lighthouse. Stay longer and take time to visit Roosevelt's Estate and gardens by bicycle along the quiet roadways through the island.

**Day one:** Meet at 9am to spend the day paddling to the lighthouse from the harbor.

**Day Two:** We'll launch early and paddle to the outer islands and through the "feeding grounds" in search of whales and porpoise, with lunch on a remote island.

**Prices include:** Kayaking gear, registered Maine Sea Kayak Guide and lunches both days.

**Not included:** Guide gratuities.

**Fee: \$275pp**
